

**DEPARTMENT OF ENVIRONMENTAL SERVICES NEW HAMPSHIRE
WASTE MANAGEMENT DIVISION**

Licensed Remediation Consultants

The following list contains the names of those consultants which requested to be included on the Department of Environmental Services list of Licensed Remediation Consultants and which have the professional engineering (PE) and/or professional geologist (PG) licensure required for performing the various aspects of site investigation and remediation. This is not a list of pre-qualified consultants. Firms on the list vary in size and capability. Anyone using this list to hire a consultant is urged to discuss their needs with the consultant under consideration before retaining them.

This list is not a complete list of consultants who perform remediation activities, does not constitute an endorsement of those firms on the list, nor is it a statement against any firm not on the list. A responsible party may retain any consultant who can perform the desired service. Individuals hiring a consultant should contact several firms to determine the service that can be provided, the familiarity with the specific remediation process that may be required, availability, workload, as well as, the price range. For best results, consultants with experience with the particular service to be performed, and who are knowledgeable of the governmental requirements, should be considered above others.

Licensed Remediation Consultants

The following list contains the names of those consultants which requested to be included on the Department of Environmental Services list of Licensed Remediation Consultants and which have the professional engineering (PE) and/or professional geologist (PG) licensure required for performing the various aspects of site investigation and remediation. This is not a list of pre-qualified consultants. Firms on the list vary in size and capability. Anyone using this list to hire a consultant is urged to discuss their needs with the consultant under consideration before retaining them.

This list is not a complete list of consultants who perform remediation activities, does not constitute an endorsement of those firms on the list, nor is it a statement against any firm not on the list. A responsible party may retain any consultant who can perform the desired service. Individuals hiring a consultant should contact several firms to determine the service that can be provided, the familiarity with the specific remediation process that may be required, availability, workload, as well as, the price range. For best results, consultants with experience with the particular service to be performed, and who are knowledgeable of the governmental requirements, should be considered above others.

This list is not a complete list of consultants who perform remediation activities, does not constitute an endorsement of those firms on the list, nor is it a statement against any firm not on the list. A responsible party may retain any consultant who can perform the desired service. Individuals hiring a consultant should contact several firms to determine the service that can be provided, the familiarity with the specific remediation process that may be required, availability, workload, as well as, the price range. For best results, consultants with experience with the particular service to be performed, and who are knowledgeable of the governmental requirements, should be considered above others.

The Professional Engineers Board and the Professional Geologists Board have determined that certain investigation and remediation documents submitted to the Department of Environmental Services are professional in nature and must be prepared and stamped by the appropriate professional. Both Boards have agreed on which documents should be prepared and stamped by either a professional engineer or a professional geologist and which documents should be prepared and stamped only by a professional engineer. The following is a list of documents that require a professional stamp.

Document	Requirement for Preparation And Stamping
Initial Site Characterization Report	No Requirement
Site Investigation Reports	Engineer or Geologist
Remedial Action Plan Report	Engineer
Pilot Tests and Associated Reports	Engineer or Geologist
Design Report	Engineer
Construction Plans and Specifications	Engineer
Remedial Action Implementation Report	Engineer
Periodic Status Report	Engineer or Geologist
Groundwater Management Permit Application	Engineer or Geologist
Annual Summary Report	Engineer or Geologist
Quarterly or Tri-annual Sampling Results	No Requirement
